

# Dirks Health

Gym Streamlines Operations With BioLock

## The Company

Dirks Health has been dedicated to helping people achieve and maintain good health for 25 years. Their involvement in the Health industry over this time at both a Personal and Corporate level, has been built on the basis of education and more importantly re-education of the importance of maintaining a good work, family and life balance.

The group includes a two level gym with 9 personal trainers and a retail outlet. They also offer corporate presentations on health and wellness to some of Australia's leading companies.

## The Problem

The gym is often unattended outside of regular hours. Many regular customers wish to utilise the facilities of the gym outside these hours without their personal trainer being present. Also, when exercising, many clients don't wish to carry items like keys or swipe cards with them.

## The Solution

The BioLock fingerprint recognition lock from BRS was installed. With the BioLock, all approved personal trainers and clients have their fingerprints enrolled on the system. From then on, they can just use their finger to open up the gym. The system also keeps track of who accesses the gym and at exactly what time, so the risks are substantially reduced. Also there is no need to carry any keys or swipe cards with you.

## The Benefits

Proprietor, Dirk Hansen said

*"The BioLock has really expanded our options for doing business. The gym is essentially available 24 hours a day so our clients and trainers have much more flexibility than they did before. And at the same time I have peace of mind."*
