

Intelligent Device Management

Digital Relay Boards (Secured Input/Output)

Suitable Applications

- Lockers
- Multiple Doors
- Plant & Equipment
- HVAC
- Home Automation
- Lift Control

BioLock Multi SIOB systems®

BioLock makes opening and closings or actuation of multiple doors and devices easy by simply placing a finger on the sensor, thanks to its innovative digital hardware.

Each BioLock can interface up to 31 individual digital input/output boards that can be used to activate multiple doors, lockers, home automation systems, arm/disarm alarm panels, HVAC, plant & equipment.

BioScan Multi SIOB systems®

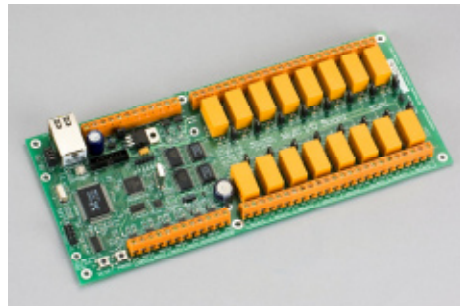

BioScan's sophisticated hardware can actuate hundreds of devices, secure storage doors, lockers easily managed with sophisticated management software and robust biometric hardware as used at major airports and prisons.

Each digital multi IO board can manage sixteen outputs at a time, and the system can expand to several hundred by simply adding additional multi IO boards.

Robust Safe-Proven Technology

There are many advantages:

- no more key stolen, lost or broken
- No more forgotten codes
- Commercial grade, durable and flexible

16 Digital Output IO Board for BioScan
