

BioWeb

Workforce Management Solution

BioWeb Workforce Management

BioWeb is a web based solution for Time & Attendance and Award Interpretation using the BRS BioScan Biometric Time Clocks. The BioWeb Workforce Management Solution is an invaluable tool for Line Managers, Payroll Departments or anyone in the business that needs on-line access to staff attendance records. The use of biometric (fingerprint) readers in the BioScan eliminates 'Buddy Punching' (staff members clocking on for other staff) and Time Fraud which can have a serious negative impact on labour costs.

The BioWeb Benefits

Information When and Where You Need It.

BioWeb has been designed with the Users and Management as its highest priority. Too often systems do not deliver timely and accurate information to people who need it NOW and not when a report is run, printed and delivered. BioWeb presents this information online. Being web based users can access the information remotely, away from the confines of the office environment.

Deal ONLY with Exceptions.

In a fast paced business environment it is vital that people only deal with things that require attention. BioWeb is designed to report on Exceptions that require decisions to be made or approvals given and viewing ALL records to locate the few that require attention is a thing of the past with BioWeb.

See Only what you Need to See.

The BioWeb Work Bench is designed to display the Menu item that User's will require on a Daily basis to manage the Attendance records of staff that report to them.

On-line view of Staff Attendance & Exception Management.

Know where your staff are - An online view of staff that are Absent, Present or Expected to arrive on a later shift.

Dealing with Exceptions - Indicators to line managers of 'exceptions or approvals' that require their attention from the previous day or that require attention before payroll preparation.

BRS BioScan - Biometric Timeclock.

Proof of Identity is guaranteed with BRS's BioScan RF technology fingerprint sensor. BRS believe that our technology is more secure, reliable and more accurate than 'Optical' sensors.

BioWeb Administration

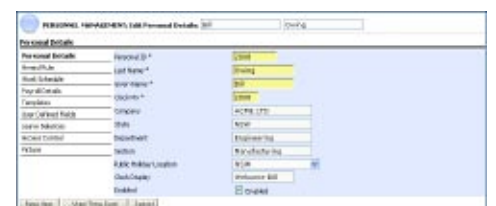

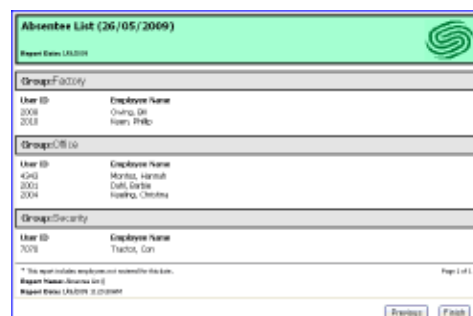

Overview

The BioWeb Administration Module is designed to manage a network of BRS Biometric Units across a scalable network. The Administration Module is comprised of the following functions –

- BRS Biometric Unit Management
- User Administration
- Time & Attendance and Access Control Reports
- Export capability to third party applications
- Organisational structure administration
- User and Role based database security
- End-user report writer

Benefits

- Ease of deployment and operation
- Scalable
- Web based
- Can be used as a Utility application working with third party systems

BioWeb Security Management

Overview

BioWeb Security Management is a scalable web based solution using the BRS Biometric Units (BioScan + BioLock *)

BioWeb Security allows organisations to establish and manage

- Advanced User & Security Permissions
- Duress Settings
- Anti Pass Back
- Multi Person Verification

The Benefits of BioWeb Security

Time Zone Management

The ability to establish specific Rules Based parameters for individual or group based users dependent on their access privileges or workplace attendance requirements

*available September 2009

Access Control

BioWeb Security is designed in Australia and is fully configurable for international markets. BioWeb Security is well suited to organizations that require a solution for managing the access of the staff to designated areas of the organisation at specific times.

Locker Management

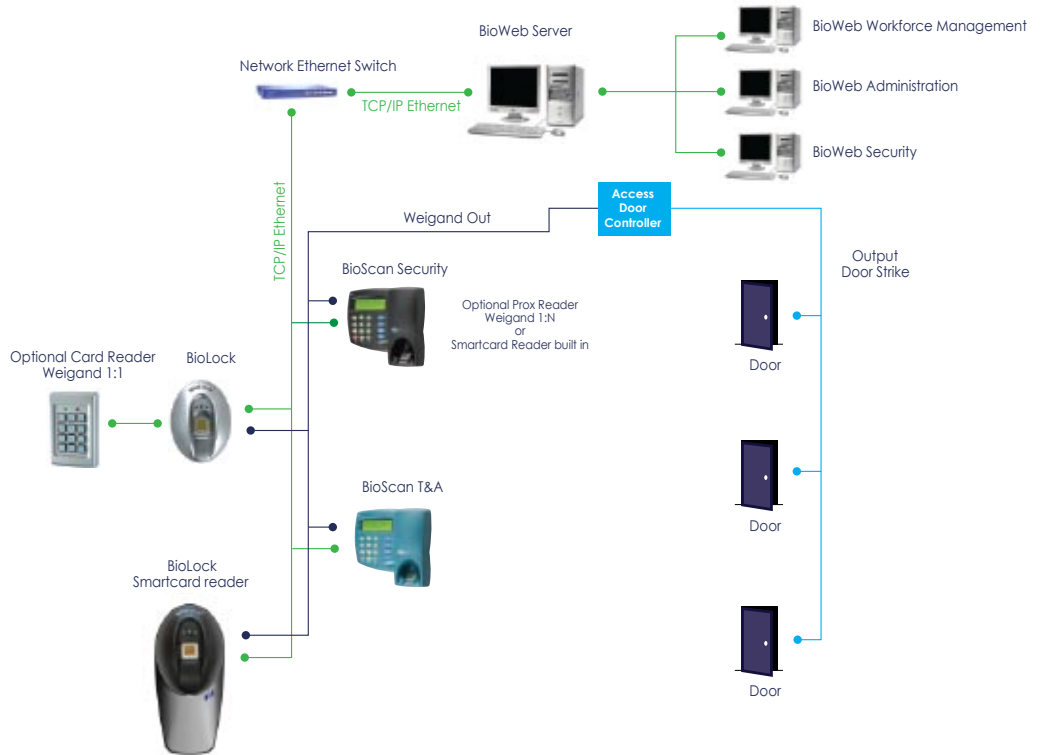

The ability to control the access to Lockers within the workplace to provide security for company and personal belongings. The major benefit is to provide auditable, keyless entry with rules based control to an individual locker or secure lockers, rooms, cages etc containing sensitive, restricted or valuable contents such as drugs, poisons, explosives, firearms etc.

BioWeb

Hardware + Software Specifications

BioWeb Overview Schematic

HARDWARE

Minimum Operating System Requirements

- Windows XP Pro
- Windows Vista
- Windows Server 2003 – 2008
- SQL Server 2005 Express Edition – Installed as part of BRS installation kit

Minimum Database Server Requirements

- HDD – Min 250Gb
- Intel Duo 2
- 3Gb RAM

Minimum Client PC Requirements

- IE7 (Internet Explorer)

Network / Cabling for BioScan Units

- 240v GPO
- TCP/IP – CAT5 Cable
- Network Hub / Switches 100Mb
- Static IP Address

Compatible Devices

- BioScan T&A
- BioScan – Security
- BioLock (available September 2009)
- Smartcard Reader (available September 2009)
